

Connect All of Your Emergency Responders Quickly With This State-of-the-Art Service.

Communities depend on the speed of communication in order for emergency personnel to respond to a fire or other emergency. Many of the current systems are outdated and not TR-303 compatible. They do not support cell phones and are in need of replacement. Outdated systems reduce the safety of a community. Firebar Service from Innovative Systems provides your community with a reliable, efficient and highly adaptable way of connecting all of your emergency responders to the call so they can quickly coordinate their plan of action.

The Way it Works

When a call is placed to the fire number the call is routed to the Application Peripheral (AP) and activates the Firebar Service. This, in turn, places outgoing calls to the specified DNs.

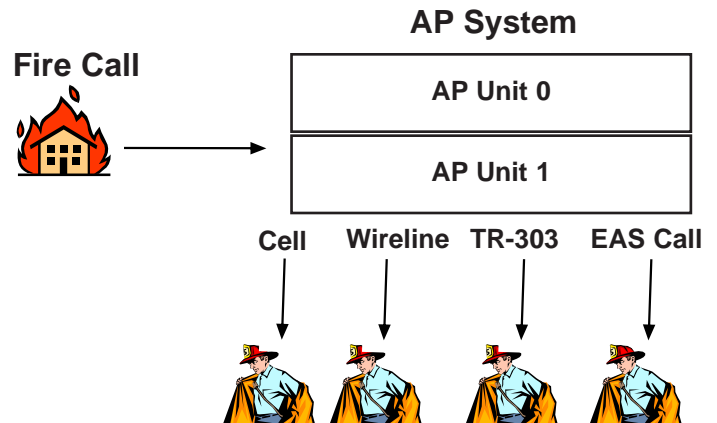

As soon as a responder answers the call, his identity is verified (if required) and he is immediately conferenced with the calling party. The conference remains in progress until everyone leaves the call. The other unanswered calls to the responders continue to ring while the conference is in progress.

Additional Features

By provisioning a responder's line as a teen line, a unique ring can be provided when the Firebar Service calls the responder. Firebar can be configured to be redundant for increased reliability and is fully compatible with caller ID and call waiting.

Specific Responder Settings Include:

- Responder Identity Verification
- Call Forwarding Option
- Determine How Long the Line Should Ring
- Interruptible ("Barge-In" Requires The Nortel DMS-10 Release 504 Generic and Service Node Trunk Control)
- Can Support up to 63 Responders

Firebar Administration Features

Subscriber Info allows specific setting control for each individual responder.

Call Logs detail call attempts and completion of every fire/emergency call.

Subscriber Info		Call Logs								
Firebars		Configuration		Members						
Dimock Fire		Name	Phone Number	Wait For Answer	Allow Forward	Allow Barge-In	Verify	Verify Time		
Mt. Vernon Fire		Adam	605-996-4010	60	No	No	Yes	60		
Parkston Fire		Dave	605-996-4011	60	No	No	Yes	60		
Spencer Fire		Mike	605-996-4013	60	No	No	Yes	60		
		Nicole	605-996-4014	60	No	No	Yes	60		
		Steve	605-996-4012	60	No	No	Yes	60
