

Notify Plus

Mass Notification Service by Voice Message, Email or Text

Your subscribers can use Notify Plus to turn their landline phone into a powerful automated messaging service. Notify Plus was built on the success of the Wake Up Plus service on the AP which many providers are still using today to notify their late pay customers. The APMAX delivers this service with subscriber control through the Web Portal or an IVR.

Subscriber Control

By accessing the optional Web Portal or Integrated Web Portal, a Notify Plus customer can set up contact lists, schedule jobs and control in progress jobs.

Three different notification mediums

Subscribers can send text messages, Emails with attached audio files and deliver recorded messages to wireline and wireless phones.

Address	Type	Description
tomtelephone@gmail.	Email / Text Gateway	web email address
xxx@verizon.com	Email / Text Gateway	text address
605-996-	Phone Number	wireline phone
605-999-	Phone Number	wireless phone
andrea@:	Email / Text Gateway	provider email

Subscriber control of in progress jobs

There's minimal need for subscribers to call customer support because the Web Portal gives subscribers the ability to pause, resume or cancel jobs while they are running. The Exceptions option allows subscribers to exclude specific entries from a scheduled job without removing them from the Phone Book.

Address	Attempts Made	Status	Time Stamp
605-995-	0	Canceled	No Actions Taken
605-999-	0	Canceled	No Actions Taken
tomtelephone@gm	0	Canceled	No Actions Taken

Current Status: Paused

Buttons: Add, Delete, Resume, Pause, Cancel, Refresh

Unlimited Applications

Anyone who has a database of customer contact info can benefit from this service.

- Meeting Notifications
- Expiration Notices
- Prescription Renewals
- Scheduled Maintenance Reminders

Entry Import Feature

Large lists of numbers can be quickly imported from a CSV, TXT or XML file

96 Port Capacity

Notify Plus has the ability to make up to 96 simultaneous calls.

Set it and forget it

Subscribers can set up dates and times for jobs months in advance.

Email Job Reports

Email reports with an attached spreadsheet status report for every entry in a completed job.

Receipt Acknowledgement

Call recipients can use their phone pad to confirm a notification call or respond to a single list polling option. This information will be included in the job report.

Supports Call Transfer

Called contacts can have the option of using their phone to transfer to certain APMAX services, Bill Pay IVR or any other phone number associated with the job.

Remote Message Recording

Subscribers can add new recordings through an IVR and then manage them with the Web Portal or Integrated Web Portal option.

Phone IVR Job Activation

Notify Plus can be configured to allow subscribers to call an administrative number to activate a notification job.
