

Originating Call Manager

The access, control and billing accountability features of OCM give subscribers multiple benefits from one service that can help them to better manage their outgoing phone calls.

The **Originating Call Manager** feature:

- Controls the type of calls that are placed from a subscribers phone
- Restricts access to specific phone numbers
- "Blocks" or "Allows" call types, including International, 10-10-X, Operator, Long Distance and Local

Originating Call Manager:

- Block all types of outgoing calls or dialed digits
- Budget monthly minutes with auto replenishment
- Use of Web Portal* to manage account codes which saves time and increases service provider margins

Account Code Plus

- Subscribers to this service can receive periodic reports via e-mail.

- Used in connection with a capable billing system.

- Designated administrators can add, delete, or query account codes using the Web Portal.*

Account Code PLUS

Account Code Plus gives business toll customers the ability to manage their account code system and additional originating call options directly and conveniently from the service providers Web Portal. When a user places a toll call, they are prompted to enter an account code, which is verified against predefined account code(s) valid for that caller.

Budget Toll

A subscriber to the Budget Toll service is allotted a budgeted number of toll minutes per month. When more than 100 minutes of toll time remains, the feature is transparent to the user. An announcement will be provided to the caller when toll calls are originated with less than 100 minutes of toll time remaining. Once the allotted time has been depleted, a subscriber attempting to place a toll call will receive an announcement stating that their time has expired and they will be unable to place the call. Budget Toll can also be configured to restrict calls to numbers not considered toll numbers.

Subscriber Control

With the Web Portal option, a subscriber can make changes that effect how the service treats outgoing calls and add additional account codes for outbound toll calls.

Budget Toll

- Limits the exposure of the telephone company to uncollectable toll charges.

- Allows the collection of additional revenue by allowing a limited number of toll minutes to subscribers who would otherwise be denied toll service.

- Service alerts caller when toll minutes are nearly depleted.

*Only available through the optional Web Portal

Account Codes
