

# Weather Plus

People will always be interested in the weather and you can't assume that they will always be close to the TV or an Internet connection. With Weather Plus you can promote quick access to current weather conditions from their wireline or wireless phones.

**Provide A Valuable Service AND Promote Your Brand**

1. Caller dials weather # such as xxx-temp
2. Service plays promotional message (if configured)
3. Service voices current conditions
4. Service plays promotional message (if configured)

**Flexibility For Multiple Exchanges**

The Weather Plus Service will support multiple weather station locations.

**Maximum Weather Stations Supported per APMAX System**

Vantage Pro Stations	NOAA XML Feeds
0	8
2	6
4	4

**Two Weather Data Options**

**Davis Weather Pro 2 Plus**

Complete sensor suite to set up on location. Equipment purchased separately from a Davis Weather distributor.

**Data From NOAA XML Feeds**

Weather Plus retrieves conditions for the configured NOAA weather station and stores the results in memory for access by the caller. *Eliminates the need to purchase weather monitoring equipment.*

**Announcement Insert Capability**

Up to 10 announcements can be rotated before and/or after the weather announcement.

Announcements can be easily recorded over the phone.

**Integrates with IS Middleware**

Weather Plus in conjunction with Innovative Systems IPTV Middleware allows weather condition display options on a subscribers television.

## Weather Station Requirements

Weather Plus for APMAX is designed to work with the Davis Instruments Vantage Pro2 and Pro2 Plus Weather Stations.

The weather station and associated equipment (except for the DB9M to DB25M Serial Adapter) may be ordered directly from Davis Instruments.

## Davis Contact Information:

800-678-3669 Davis Toll-Free Order Line

- Model # 6162C Cabled with Standard Radiation Shield\*

## Required Serial Interface for Davis Weather Station Equipment

- WeatherLink Model # 6510SER

## Required Serial Adapter for Davis Weather Station Equipment

- DB9M to DB25M Serial Adapter (This part is not available from Davis. If desired, one may be purchased from [www.cablestogo.com](http://www.cablestogo.com) or other cabling vendors.)

## Optional Davis Weather Station Equipment

### Mounting Tripod

Brackets at the base of each leg tilt to mount on a roof or uneven terrain. Made of galvanized steel. Includes two 3-foot (0.92-meter) poles, which may be used separately or together

*\*Note: Careful consideration should be given to isolated ground zone issues. For this reason, Innovative Systems recommends that the wireless weather station be used.*
