

Integrated Web Portal

Combined with the Web Portal, the Integrated Web Portal gives subscribers a powerful communications tool that integrates advanced telephony services with a Unified Address Book and is accessible from the most popular browsers.

Integrated Web-page Interface

- Anchor for your subscriber's wireline service
- True contact management
- Click to Call & Click to Email
- Google Map interface
- "Quick Click" Conference Calling

Reduces Support Calls

The web portal allows customers the option of controlling their services and reduces the calls to your support group for things like password changes, turning on and off features, and lost conference bridge IDs and phone numbers.

Address Book for your Wireline Subscribers

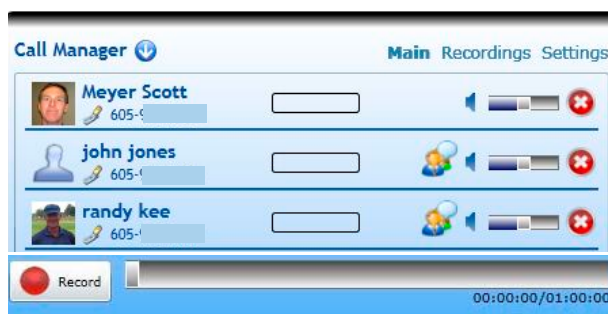

Where do wireless users get their phone numbers? The Integrated Web Portal delivers with phone numbers and much more for your wireline subscribers.

- Multiple numbers per contact
- Email addresses
- Contact pictures
- Contact addresses and Google map
- Import info from Outlook or V-Card
- Real time Call Log

Click To Call or Email

A single mouse click can initiate a phone call or an Email to one of your contacts. Subscribers can also add multiple contacts to create a conference call with recording capability.

Customer Control 24/7

- Unified Messaging
- Auto Attendant
- On Demand Conferencing
- Terminating Call Manager/DND
- Single Number
- Originating Call Manager
- Account Code Plus
- Notify Plus
- IS IPTV Video (My TV tab)

Key Administrative Features

- Play, transfer and delete voice messages
- Add or delete Email addresses from your Voice Message to Email notification
- Adjust volume, mute, record and add attendees to On Demand Conference calls
- Set up and administration of Notify Plus notification jobs
- Add phone numbers to your TCM or OCM blocked and allowed lists
- Change phone numbers in your Single Number service
- And more
