

# Originating Call Manager / Account Code Plus

## Three Services in One!

- Blocks outbound Long Distance Calls without a Pass Code
- Sets minute restrictions for your Budget Phone service offerings
- Accounting service for client call times

*“OCM gives us a reliable way to limit the number of local calling minutes in our SAFETel Product here at TCT.”*

**Richard Wardell, Network Operations Manager TCT,  
Basin, WY**

## The OCM

- Controls the type of calls that are placed from a subscriber's phone.
- Restricts access to specific phone numbers.
- “Blocks” or “Allows” call types, including International, 10-10-X, Operator, Long Distance, and Local.

## Account Code Plus

- Providers can require an Account Code before placing calls.
- Account codes are verified against a predefined list of codes that are valid for that subscriber.
- Blocking of international calls can be set up.
- Blocking for any type of non-911 outbound calls for residential and commercial accounts can be configured.
- Time limitations on calls to specific numbers can be initiated.
- This feature could be used to monitor call minute usage for efficiency or employee abuse.

## Web Portal Customer Care

With the new HTML5 format, subscribers can manage their allowed /blocked lists and set up Account Code credentials.

## Budget Toll Lets You Offer a Basic Phone Service

A subscriber is allotted a specific number of minutes per month. When more than 100 minutes of time remain, the feature is transparent to the user. An announcement will be provided to the caller when calls are originated with less than 100 minutes of time remaining. Once the allotted time has been depleted, a subscriber attempting to place a non-911 call will receive an announcement stating that their time has expired and they will be unable to place the call.
