

Innovative Systems, L.L.C. is looking for a qualified individual to join our Development Team

Billing Conversion Software Developer

Job Purpose

Software development to convert clients and their data coming from other OSS/Billing systems into our OSS named eLation for successful deployments

Location

This position will be full-time in Mitchell, SD Remote work will NOT be considered for this position.

Responsibilities *(including, but are not limited to):*

- Create software to process and convert data from legacy vendor systems into our OSS, eLation using Microsoft Visual Studio & C# as well as Microsoft SQL Server Management Studio
- Test created software by verifying required functionality, checking data robustness and accuracy, and proposing improvements to our processes
- Coordinate and communicate with fellow developers, support staff, and clients throughout the development cycle to ensure the data conversion meets requirements and expectations of all involved
- Accurately track development time and tasks with use of eLation timesheet app to track time allocations and the use of Microsoft DevOps to properly update your current project status and state of each current task
- Communicate any roadblocks to the team timeline to allow the team leader to adapt and re-shift priorities and team resources when needed

Skills/Requirements

- Communication - Must be able to work effectively and productively with a variety of staff including fellow developers, software support personnel and even the clients themselves. The ability to communicate professionally, thoroughly, and politely is very important to our team.
- Process-oriented – We are looking for team members who can follow a process, make efficient use of time, and always be helping us to improve our processes.
- Team-focused – We are looking for individuals who can work effectively as part of a team, able to maintain good relations with their coworkers and work together to solve problems and achieve success, as well as do their part to make the team stronger.
- Development – We are looking for individuals who are productive and able to stay on task and take pride in their testing of their code, and always looking to improve, adapt to team standards and be able to learn new tools and technologies such as the appropriate leverage of Copilot, etc.
- Continuing education – We are looking for individuals who maintain an interest in software development and are keen on always learning and applying what they learn.

Education and Experience Requirements

Bachelor's degree in computer science required, experience with Microsoft Visual Studio and C# as well as Microsoft SQL Server is preferred.
