

SDP Software Engineer

Innovative Systems is currently seeking applicants for a Software Engineer to join our talented team.

This position is located in Mitchell, SD. Remote work is not available for this position.

When you are part of the Innovative team as a Software Engineer, you will:

- Design, develop and deploy applications according to the company's standards for software architecture.
- Write unit and integration tests necessary to ensure the reliability and consistency of software.
- Work with product leads, software architects and project managers to implement technical solutions that meet the requirements and support documentation.
- Troubleshoot application issues in development, test and production environments.
- Create and update technical applications and project documentation.

We are looking for the right candidate. We believe someone in this position would benefit from these requirements:

- B.S. in Computer Science or related field
- Strong knowledge of C# or related languages.
- Capacity to work with various development methodologies, including agile
- Knowledgeable with Microsoft SQL Server
- Ability to work independently as well as part of a team
- Strong verbal and written communication skills
- Excellent analytical and problem-solving skills

These additional skills would be helpful but are not required:

- 1+ years of experience in WinForms, WPF or other window application development
- Telnet, SSH, SNMP, SOAP/XML over HTTP
- REST APIs
- Experience with Azure CI/CD tools

If you aren't excited to work for Innovative Systems yet, we want to tell you a little more about what we can offer to the right candidate:

- Highly competitive wages
- Generous Paid time off
- 10 paid holidays
- 401(k) matching
- Company paid family Blue Cross Blue Shield health insurance plan
- Company contributions to an HSA plan
- Company paid employee Dental Insurance
- Company paid employee Vision Insurance
- Company paid Life Insurance
- Company paid Short- & Long-Term Disability Insurance
